

Breaking News ...Water licence

The High Court in Madrid has recently overturned the action by the Jumilla town hall concerning the shepherd and reinstating the suspension of parcellisation of the land at SADM. The Court had asked for proof about the availability of water for SADM and crucially HdT have received the stamped and dated document (29 November 2010) giving permission for change of water use and confirmation of water resources for phase 1 to go ahead.

This document has been presented to the court and provides proof of the availability of water for SADM. Not many of the papers were aware that HdT had received the document confirming the change of use of the water, so please do not be alarmed by any news reports, this is an irritation rather than a disaster.

HdT have provided us with a copy of the front page of the document which we are attaching for all of our members and also place on our website. HdT will also be placing an update on their website regarding this document and a copy of the front page.

SARC will continue to fight for our homes and our money and do it all it can on behalf of its members and endeavour to keep all informed.

Tony on behalf of the SARC committee
